Program Description

SpreadEdge Diversified Seasonal Spread Program is designed to provide exposure to a broad base of energy, and agricultural futures markets. Markets generally traded include (but are not limited to) Crude Oil, Brent Crude, Natural Gas, Gasoline, Heating Oil, Gas Oil, Chicago Wheat, KC Wheat, Corn, Soybeans, Soybean Meal, Soybean Oil, Live Cattle, Feeder Cattle, Lean Hogs, Cocoa, Cotton, Coffee, and Sugar.

The Program seeks to achieve significant profits across a broad variety of market conditions (both bull and bear markets, inflationary and deflationary environments). To achieve their objectives, the Programs involve speculating in futures contracts (or options thereon) available for trading on any U.S. exchange. Trades are typically seasonal calendar spreads or intra-commodity spreads (such as Chicago vs. Kansas City wheat). Inter-commodity spreads are not generally used. Options are normally not used but could be used in extreme market conditions for risk management purposes.

Overview

Program Description

SpreadEdge Ag Seasonal Spread Program is designed to provide exposure to a broad base of U.S. agricultural futures markets. Markets generally traded include (but are not limited to) wheat, corn, soybeans, soybean meal, soybean oil, live cattle, feeder cattle, lean hogs, cotton, coffee, sugar, cocoa, and orange juice.

The Program seeks to achieve significant profits across a broad variety of market conditions (both bull and bear markets, and inflationary and deflationary environments). To achieve their objectives, the Programs involve speculating in futures contracts (or options thereon) available for trading on any U.S. exchange. Trades are typically seasonal calendar spreads or intra-commodity spreads (such as Chicago vs. Kansas City wheat). Inter-commodity spreads are not generally used. Options are normally not used but could be used in extreme market conditions for risk management purposes.

Effective risk management, such as the use of stop-loss orders, is a crucial aspect of the Programs, and the Advisor will at times employ risk management techniques in its discretion.

Program Description

SpreadEdge Energy Seasonal Spread Program is designed to provide exposure to a broad base of U.S. energy futures markets. Markets generally traded include (but are not limited to) crude oil, Brent crude, natural gas, gasoline, heating oil, gas oil, copper, and euro dollar.

The Program seeks to achieve significant profits across a broad variety of market conditions (both bull and bear markets, and inflationary and deflationary environments). To achieve their objectives, the Programs involve speculating in futures contracts (or options thereon) available for trading on any U.S. exchange. Trades are typically seasonal calendar spreads or intra-commodity spreads (such as Brent Crude vs. WTI Crude). Inter-commodity spreads are not generally used. Options are normally not used but could be used in extreme market conditions for risk management purposes.

Effective risk management, such as the use of stop-loss orders, is a crucial aspect of the Programs, and the Advisor will at times employ risk management techniques in its discretion.
